

EIPM ANNUAL CONFERENCE

Generating Value out of Growing Complexity

Mastering it, Leveraging it

06th – 07th DECEMBER 2018
ARCHAMPS, FRANCE

About

As companies face growing complexity and experience vital transformations, Purchasing has a major role to play in helping them find opportunities and develop new competitive advantages.

At the upcoming EIPM Annual Conference, we will explore how we can contribute to generate value in such a context and how Purchasing can transform complexity into an advantage.

This will lead us to examine the following questions, among others:

- ✓ What does it mean to innovate and generate value in such a context?
- ✓ Should we measure our contribution to the transformation of our companies?
- ✓ Can we find other ways to assess, benchmark and communicate our contribution to the success of our companies?

All these challenges are uppermost in the minds of CPOs and Executives in Europe and beyond.

Join us to answer these questions together with leaders and experts from industry, academia and consultancy.
